#### Projects:

**Pygame(Hand Cricket)**

I have created a hand cricket game with a python console and converted it into an executable file. Just download that .exe file and enjoy the game.

**My Personal Portfolio**

I've created my personal portfolio by using HTML, CSS, and Javascript without the use of any external builtin tools.

**Birthday Wishes**

I have created a responsive birthday greeting card. It will be so amazing and interactive with more animation. I would say this will be the best gift that is given online. Hop on into the given link and just download the HTML file.

**Restaurant Webpage**

I have created a restaurant website with bootstrap 4 UX and deployed at github.

**And some mini projects**
